## MOVING UP:

### *Leadership Skills to Cultivate for Career Advancement*

Navigating the path to career advancement requires more than just ambition; it demands a strategic focus on developing key leadership skills. Join us for "Moving Up," a workshop designed to give you the tools for your next professional step. We'll explore the skills crucial for success in today's VUCA (volatile, uncertain, complex, ambiguous) environment, talk about why they really matter and what might trip you up. You'll leave with a personalized development plan to drive your career forward.

- ✔ Describe the significance that external perceptions play in your career growth. Leverage techniques to gather external perceptions in order to enrich your understanding of how you're viewed.
- ✔ Examine three core leadership skills required for today's environment. Define each of the skills, their importance, and potential obstacles to effectiveness.
- ✔ Describe and apply strategies for real-world skill implementation. Create a personalized development plan to ensure ongoing growth and progress toward your next step.
